Opioid Misuse or Addiction:
Need Help Now?

**Resources For Drug
and Alcohol Help
In Allegheny County**

What Is An Opioid?

Opioids are medications that doctors prescribe to treat pain, and drugs like heroin which are illegally obtained on the street.

What are the names of the more common opioids?

GENERIC	BRAND NAME
HEROIN	N/A
HYDROCODONE	Vicodin, Lorcet, Lortab, Norco, Zohydro
OXYCODONE	Percocet, OxyContin, Roxicodone, Percodan
MORPHINE	MSContin, Kadian, Embeda, Avinza
CODEINE	Tylenol with Codeine, TyCo, Tylenol #3
FENTANYL	Duragesic
HYDROMORPHONE	Dilaudid
OXYMORPHONE	Opana
MEPERIDINE	Demerol
METHADONE	Dolophine, Methadose
BUPRENORPHINE	Suboxone, Subutex, Zubsolv, Bunavail, Butrans

What should I do if my doctor prescribes an opioid?

- Talk with your doctor about the safest way to use your medication
- Make sure you understand the signs of an overdose or a bad reaction to the medication
- Have a plan for what to do in case of an overdose or bad reaction
- Ask your doctor about a prescription for **naloxone**

Who is at risk for an opioid overdose?

- Anyone using an opioid, including those who take medications that are prescribed

Are You Witnessing An Overdose?

Symptoms Include:

- Person won't wake even if you shake them or say their name
- Breathing slows or even stops
- Lips and fingernails turn blue or gray
- Skin gets pale, clammy

What Should You Do If You Witness An Overdose?

- Immediately administer naloxone if you have it available
- Call 911
- If needed, do rescue breathing or chest compressions
- If no response to the first dose of naloxone within 3 minutes, give a second dose
- Follow 911 dispatcher instructions
- Stay with the person until on-scene help arrives

What Is Naloxone (Narcan)?

What is naloxone?

- Naloxone is a drug that reverses opioid overdoses by interacting with the opioid receptor itself
- It cannot harm a person overdosing from another kind of drug

Who should carry naloxone?

Anyone who uses opioids for any reason, even prescription drugs, can misuse them or become addicted. Talk with your doctor about naloxone (generic name)/Narcan (brand name); naloxone should be prescribed to carry with you in case of overdose.

Where to get naloxone:

Any resident of PA can **legally** purchase naloxone at any pharmacy. A list of pharmacies that carry naloxone is available here:

www.achd.net/overdoseprevention.

Call **412-687-ACHD** if a pharmacy near you doesn't carry it.

Naloxone is covered by most insurers, including medical assistance.

Free injectable naloxone is available via PreventionPoint Pittsburgh.

Find more info here: www.pppgh.org or call **412-247-3404**.

You can also ask your doctor for a naloxone prescription.

Other Things You Can Do

Get rid of unused prescription drugs by calling Project D.U.M.P.

(Disposal of Unused Medications Properly) **412-459-5000**

Residents of Allegheny County can call this hotline 24 hours a day to schedule a pick up, anywhere, of their unwanted prescription medications or illicit substances.

Needle exchange and harm reduction. If you or someone you know is injecting drugs illegally, make sure they are protecting themselves and others with a clean needle. Visit Prevention Point Pittsburgh for more info about time and location of needle exchanges in Allegheny County. www.pppgh.org or call **412-247-3404**.
