\*Cases meeting the 2021 CDC print criteria were included. Case classification status (confirmed, probable, possible, suspect, unknown, not a case) is factored into a condition's print criteria, the standards upon which CDC can publish cases in national reporting.

\*\*STD reports are excluded from this table but are included in a separate report on the ACHD website.

\*\*\*Print criteria changed sometime between 2012-2021

\*\*\*\*Most Lyme disease reports were not investigated in 2015-2021, so the numbers here vastly underrepresent the burden of disease

\*\*\*\*\*Disease became reportable in 2022

‡ The case definition for acute hepatitis C changed in 2020

Note: for reports of STIs see [Sexually Transmitted Diseases | Health Department | Allegheny Home \(alleghenycounty.us\)](#)
