Health Department Issues Rabies Precautions for O'Hara Residents

PITTSBURGH – The Allegheny County Health Department (ACHD) is informing residents in O'Hara Township that a rabid raccoon was killed by a dog on Tuesday, April 18th, in the 1100 block of Calmwood Road. The dog had been vaccinated against rabies and is fine.

The Health Department reminds all county residents to avoid contact with wild animals or animals they do not know. Residents should have their pets vaccinated, and watch for unusual behavior.

“Well-intentioned efforts by individuals sometime can result in unnecessary exposure to pathogens like the rabies virus,” said ACHD Director, Dr. Karen Hacker. “We strongly advise O'Hara residents to stay away from wild or stray animals, especially in the area where the rabid raccoon was found, and if animals appear to be acting strange or become threatening, call your local animal control service, the police or the Pennsylvania Game Commission.”

Any individual who is bitten, scratched or otherwise exposed to saliva from a stray or any other animal, should immediately cleanse the contact area with soap and water, seek emergency medical treatment and call the ACHD, 412-687-ACHD (2243), to report the incident.

Rabies is a virus transmitted by an animal bite or scratch. It is almost always fatal when exposures are left untreated. The rabies vaccine is highly effective when given promptly after an exposure, but is still a major expense and inconvenience that can be avoided. The best prevention is to avoid stray animals, wild animals or those acting strangely as they can be potentially rabid.

So far this year, there have been two rabid animals reported in Allegheny County.
